

# Far More Than Dots On A Map!

Trailers are one of your most valuable assets, but without the right visibility, managing them can feel like a guessing game. While they drive revenue every day, many fleets in the transportation industry struggle to track, monitor, and maximize their use.

TGI Connect satellite-powered tracking simplifies fleet operations, reduces inefficiencies, and improves performance.

We offer a bundled hardware and software system that provides cutting edge technology to deliver consistent reliable data and useful Business Intelligence with deep integrations that fit into your transportation eco-system.

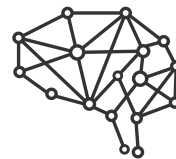

## Hardware

Satellite-connected hardware ensures you see all of your trailers at all times

## Software Tools

Customizable software with geofencing, landmarks, and proactive alerts

## Business Intelligence

Powerful business intelligence reporting enables data-based decision-making

## Integrations

Deep integrations enhance your transportation eco-system

# Hardware

## SmartOne Solar™ Features

- Solar powered battery
- Maintenance free hardware
- Quick Installation (No wiring)
- 5-year warranty
- Intrinsically Safe (ATEX) certified
- Compact dimensions

## SmartOne Solar™ Device

This satellite device delivers reliable, maintenance-free tracking, giving your fleet years of worry-free performance without the cost or downtime of frequent replacements.

## Vizicube Smart Sensor

Our sensor allows you to do more with your trailers. Capture temperature, door activity, cargo status, impact and hard breaking using powerful AI technology.

# Software

- Automated Yard Checks
- Dwell
- Detention
- Mileage
- Asset Utilization
- ROI Reports
- Geofencing and Landmarks
- Customer Live Link

## My Connect Manager

TGI's insightful business software is powerful software developed in-house at TGI specifically for trailers. In-depth reports and alerts using our unique Rules Engine to help you run the business more efficiently.

## TGI Connect Mobile App

Utilize our powerful My Connect Manager software directly on mobile for instant access to alerts and reports. Save driver time by helping them locate the correct trailer in minutes.

# Integrations

Integrate with your other transportation software to streamline data coming in through your eco-system.

We have deep integrations with many industry-leading transportation systems meaning no disruption to your workflow.
