

Protect Your Assets. Know the Moment They're at Risk.

The TGI Connect SmartOne with Tamper Switch is a discreet security device that instantly alerts you if your tracking device is removed or tampered with so you can take action before theft or loss occurs.

Real-Time Alerts

Receive instant MCM and email alerts if a unit is removed or tampered with.

Proactive Security

Deter theft and respond quickly to potential loss

Seamless Integrations

Tamper Switch alerts for SmartOne Solar units are built into the MCM software

Discreet Design

Compact design, engineered to avoid drawing attention

Ideal Use Cases

High-Theft Regions:

Protect trailers in areas prone to cargo crime

High-Value Loads:

Add security for shipments that attract attention

Remote Operations:

Set up alerts for trailers that can't be checked regularly in person
