

MCM Plus Updates

- **Enter/Exit Landmark Report**

Instantly track when assets arrive at or leave a specific location, no need to run full landmark reports so teams can respond faster and improve operational visibility.

- **Pre- and Post-Dwell Email Rules**

Automatically notify stakeholders before assets dwell too long and after they move, helping reduce delays, protect service levels, and drive proactive decision-making.

- **Dwell ROI Tab**

Turn dwell time into measurable business impact by clearly showing the financial and operational return tied to asset utilization and reduced idle time.

- **Create Landmarks from Any Location Data**

Build landmarks directly from any report with GPS coordinates, saving time, improving accuracy, and making location management more intuitive.

- **Biometric Login (iOS & Android)**

Enable secure, one-touch access to the TGI Connect Mobile App for faster logins and a smoother mobile experience for field and operations teams.

- **Single Landmark User (Restricted Access)**

Safely share reports and asset visibility for a specific location with external partners, no full account required keeping collaboration simple and secure.

Driver Connect Mobile App

Keeping Drivers
Connected Where
Others Can't

[Learn more](#)

We introduced the TGI Driver Connect Mobile App, designed to help drivers stay connected to dispatch even when they're beyond cellular coverage. Powered by TGI Connect's satellite-based system, the app ensures critical alerts reach your team when it matters most.

What's New:

- **Satellite-Based Alerts** – Send emergency notifications even outside of cell coverage
- **Two Alert Types** – Driver Urgent Alert and Breakdown Alert for clear, fast communication
- **Find My Trailer** – Quickly locate and navigate to assigned trailers with ease

The TGI Driver Connect App is free to download and can be set up by TGI Connect customers directly in My Connect Manager Plus.

Featured Blog: How Driver Connect Mobile App Improves Driver Communication When Coverage is Limited

Our latest blog dives into how the Driver Connect Mobile App enhances driver communication when traditional service is unavailable.

You'll learn how the app's urgent and breakdown alerts let drivers send structured notifications that reach dispatch even in dead zones via nearby satellite devices, reducing calls and improving visibility for operations teams.

The article also highlights the Find My Trailer feature, which helps drivers locate assigned trailers quickly and navigate right to them, cutting down search time and boosting efficiency. Overall, it's a practical look at how Driver Connect supports real-world communication challenges on the road.

Updated Literature: Driver Connect Mobile App

Our latest brochure highlights how the Driver Connect Mobile App helps fleets maintain critical communication when drivers operate in no cell coverage areas. You will learn how urgent and breakdown alerts are sent via satellite through TGI devices, delivering location- and time-stamped messages directly to operations teams for faster response.

The brochure also outlines how preset and customizable alerts standardize reporting, reduce confusion, and keep workflows aligned, all in a free, easy-to-use mobile app for TGI Connect customers.
