

# Managed Services

## Turning Visibility into Operational Efficiency

Managed Services is a strategic extension of the TGI Connect platform, designed to improve operational performance, reduce costs, and unlock new revenue opportunities. Our TGI experts partner with your operations team to deliver continuous, measurable improvements over time, getting the most out of the TGI Connect platform.

### Realize What's Missing

Limited time and competing priorities often make it hard to get full value from your system. Managed Services helps ensure your investment is being used the right way by identifying what's delivering results, what's being missed, and where improvements matter most. We provide a clear, ongoing plan that drives measurable performance gains and supports your broader operational and financial goals.

### The Partnership Approach

Managed Services is not outsourcing or a one-time engagement. It is a long-term, collaborative program designed to embed best practices into your daily operations.

TGI Connect becomes an extension of your team, combining deep platform expertise with transportation industry knowledge to drive sustained, measurable improvement.

### Is Managed Services Right for You?

Managed Services is designed for transportation teams that want to move beyond basic system use and achieve higher operational and financial performance. The program is a strong fit for organizations that have capable teams but limited time, unclear system strategy, or challenges turning insights into consistent action and optimized workflows.

Deliver measurable ROI quickly while building lasting operational capability. Your team is equipped with the processes, best practices, and expertise needed to sustain performance improvements well beyond the program term.

## How Managed Services Works:

| Feature                        | Operational Benefit   |
|--------------------------------|---|
| Structured Coaching Model      | We teach your team how to manage trailer operations strategically with a comprehensive plan             |
| Dedicated TGI Expert           | You gain an extension of your team with deep platform and operations expertise                          |
| Utilization Framework          | Uncover underused or misallocated trailers to improve asset productivity and reduce unnecessary spend   |
| Maintenance Strategy Alignment | Uses trends to support smarter maintenance planning   |
| Revenue Recovery Guidance      | Identify opportunities to capture missed revenue, such as detention billing and utilization of trailers |
| Workflow Standardization       | Create consistent reporting and decision-making habits across teams, reducing guesswork                 |
| Optimization Model             | Ensures the program evolves as your fleet, market conditions and business priorities change             |
| Long-Term Partner Approach     | Moves beyond short-term consulting to a sustained relationship focused on ongoing improvement           |
